A Mini Web-Page Report on
Tour & Travels Management System

Name: Om Sunil Gurav

Class: TE Computer

Division: A

Roll No.: 50

PRN: 71918065B

Guide Name: Mrs. R. D. Narwade

Problem Statement:

Create a web page using HTML, CSS & JavaScript Language.

Introduction:

The Tours and Travel Management System is a web based application. The main purpose of “Tours and travels management system” is to provide a convenient way for a customer to book hotels, flight, train and bus for tour purposes. The objective of this project is to develop a system that automates the processes and activities of a travel agency. In this project, We will make an easier task of searching places and for booking train, flight or bus.

Objective:

This application is develop to provide best travelling services to the customers and travel agents. We have developed tours and travel management system to provide a search platform where a tourist can find their tour places according to their choices. This system also helps to promote responsible and interesting tourism so that people can enjoy their holidays at their favorable places.

System Overview:

1. Hardware Requirements:

- a. Mouse and keyboard
- b. 8 GB RAM
- c. I3 or I5 processor

2. Software Requirements:

- a. HTML

b. CSS

c. JavaScript

Code:

<main page code>

```
<html>
<head><title>Tours & Travels Website</title>
<link href="Styles.css">
<style>
.head
{
height: 100%;
background: url(IMG\slide2.jpg);
background-size: cover;
background-position: center;
background-attachment: fixed;
}
.container
{

}
.login-btn
{
width:100px;
padding:8px 0;
```

```
outline:none;
border:2px solid #fff;
border-radius:50px;
background:transparent;
color:#fff;
float:right;
}
```

```
h1
{
text-align:center;
padding-top:150px;
padding-bottom:0;
font-size:55px;
color:#fff;
```

```
}
.input-grp
{
width:90%;
max-width:500px;
